CoilCraft

Heating Element System

Thermcraft is a Leading International Supplier of Thermal Products, Systems, and Accessories

CoilCraft Heating Elements are Designed to be used as Retrofits to Existing Furnaces or can be Installed as Part of a New Furnace

FEATURES AND BENEFITS

- Coilcraft heating elements are an excellent alternative to replace existing ceramic and fiber based heaters and in some cases, sic elements. SiC elements have operating temps that coilcraft elements cannot reach, but for lower temp applications, they can replace SiC elements
- Elements can be designed with leads optimized in order to facilitate rapid replacement
- Quick-change capability significantly reduces down time and maintenance costs
- Excellent temperature uniformity and rapid response time due to low thermal mass
- Most existing furnaces can typically be retrofitted for coilcraft elements with minimal modifications
- Lower watt loading translates into longer element life
